## GUIDE PRINTED BOOKS AND MANUSCRIPTS RELATING TO ENGLISH AND FOREIGN HERALDRY AND GENEALOGYGEORGE GATFIELD 1892

A Manual of Gold and Silver Coins of All Nations, Struck Within the Past CenturyJacob Reese Eckfeldt 1842 "[The book contains] one medal engraving from a daguerreotype, by Joseph Saxton, of the front of the Mint, using a medal ruling machine, to copy a relief executed by Christian Gobrecht from the daguerreotype...This book is considered the first publication from a daguerreotype in the United States. A remarkable example of this little used process and of major importance in the history of photography and photomechanical printing in the United States. Joseph Saxton not only produced the oldest extant daguerreotype now in the United States, but also invented the modification to the ruling machine used for this publication."--Hanson Collection catalog, p. 8.

International Relations Theory and European Security Lorenzo Cladi 2015-08-20 This book engages with key contemporary European security issues from a variety of different theoretical standpoints, in an attempt to uncover the drivers of foreign policy and defence integration in the EU. Although European foreign policy has been attracting an ever-increasing number of International Relations (IR) scholars since the end of the Cold War, consensus on what drives European foreign policy integration has not yet emerged. This book seeks to encourage debate on this issue by examining a wide range of high-profile security issues which have roused significant interest from policy makers, academics and the public in recent years. The volume discusses, amongst other issues, the strategic posture of the European Union as a security actor, the troubled relationship with Russia, the debate regarding France's relations with the US following France's rapprochement with NATO and the EU's influence in the Israeli-Palestinian conflict. The collective intent of the contributors to highlight the drivers of EU foreign policy and defence integration ties together the wide variety of topics covered in this volume, forming it into a comprehensive overview of this issue. By paying considerable attention not just to the internal drivers of EU cooperation, but also to the critical role played by the US as an incentive or obstacle to European security, this book presents a unique contribution to this field of debate. This book will be of much interest to students of European security, IR theory, Transatlantic Relations, European politics and EU foreign policy.

Manual on Estimation of Probable Maximum Precipitation (PMP) World Meteorological Organization 2009 The manual describes procedure for estimating the maximum probable precipitation and the maximum probable flood. This is the third revised version.

The first and second editions of this manual were published in 1973 and 1986, respectively. The current edition keeps a majority of the content from the second edition. Newly added content in this third edition primarily results from experiences, since 1986, in directly estimating PMP for the requirements of a given project in a design watershed on probable maximum flood (PMF) in China, the United States of America, Australia and India.--Publisher's description.

The Crusades Nikolas Jaspert 2006-09-27 This German-to-English translation of a highly successful book is a clear, approachable, student-friendly introduction to the history of the Crusades. With a long chronological span, from the eleventh to the late fifteenth century, and with a wide geographical coverage of the whole of Europe and some of the Middle East, The Crusades is clear, concise and more wide-ranging than most single-volume works. Taking recent scholarship into account, and using boxes, case studies, marginal directions and chronologies, the book is well laid out and easy to follow, providing a comprehensive overview of the crusade movement for students at all university levels.

Popular Entertainment, Class, and Politics in Munich, 1900-1923Robert Eben Sackett 1982 From the turn of the century until 1923, the year of the National Socialist putsch, popular entertainment in Munich reflected the sentiments and ideas of its largely middle-class audience. While industrialization, rapid urbanization, World War I, and the German Revolution of 1918-19 created an atmosphere of turbulent change, performances on Munich's popular stages gave voice to the continuity of several basic attitudes: patriotism; nostalgia for a preindustrial, rural community; hostility toward Jews; and increasing anxiety over social status. In songs, monologues, skits, and one-act plays, popular entertainers articulated views common to Munich's traditional middle class of tradesmen and shopkeepers and its "new" or white-collar middle class of clerks and minor officials. Folksingers Karl Valentin and Weiss Ferdl serve as examples of this relationship between politics and culture. They shared their audience's class background and sympathies, and in the cabarets and music halls their songs dealt with vexed social and political issues. This intriguing book in cultural history adds to our understanding of social conditions preparing the way for political change. A model case study, it explores the roots of Nazism in a large urban setting.

Count and Bishop in Medieval Germany Benjamin Arnold 2016-11-11 In this examination of the functions of lordship in a medieval society, Benjamin Arnold seeks answers to some of the most fundamental questions for the period of political and institutional history: How did the lords maintain control over the people, land, and resources? How was their rule sustained and justified? Arnold chooses to analyze the Eichstätt region, an area on the borders of three major German provinces: Bavaria, Franconia, and Swabia. The region was the geographical and political dimension within which succeeding bishops, with great tenacity and inventiveness, survived the threat of dominion by their secular neighbors, the counts. The bishops of Eichstätt were able to emerge with a durable territorial structure of their own, which they succeeded in recasting, between 1280 and 1320, into a credible and long-lasting principality. Modern ideas of political progress, Arnold contends, tend to be unfair to medieval institutions that have not left easily recognizable descendants. He argues that it would be more prudent to observe in the territorial fragmentation of Germany not the triumph of chaos but the outcome of a reasonably orderly social and legal process that provided alternative institutions to those of a centralized or national monarchy.

The Liberal Arts and the Jesuit College System Aldo Scaglione 1986-01-01 The Jesuit educational system, with its successful applications in all parts of the world for several centuries, is one of the most durable, influential, and far-reaching experiments in the history of education. In this monograph Aldo Scaglione explores the complex genesis of the system, which it regards essentially as a heritage of Renaissance Humanism; the impact of both Reformation and Catholic Counter-reformation on it; and its conflicts with the secular traditions and systems with which it competed through the centuries.
