The HP Way David Packard 2013-10-15 In the fall of 1930, David Packard left his hometown of Pueblo, Colorado, to enroll at Stanford University, where he befriended another freshman, Bill Hewlett. After graduation, Hewlett and Packard decided to throw their lots in together. They tossed a coin to decide whose name should go first on the notice of incorporation, then cast about in search of products to sell. Today, the one-car garage in Palo Alto that housed their first workshop is a California historic landmark: the birthplace of Silicon Valley. And Hewlett-Packard has produced thousands of innovative products for millions of customers throughout the world. Their little company employs 98,400 people and boasts constantly increasing sales that reached \$25 billion in 1994. While there are many successful companies, there is only one Hewlett-Packard, because from the very beginning, Hewlett and Packard had a way of doing things that was contrary to the prevailing management strategies. In defining the objectives for their company, Packard and Hewlett wanted more than profits, revenue growth and a constant stream of new, happy customers. Hewlett-Packard's success owes a great deal to many factors, including openness to change, an unrelenting will to win, the virtue of sustained hard work and a company-wide commitment to community involvement. As a result, HP now is universally acclaimed as the world's most admired technology company; its wildly successful approach to business has been immortalized as The HP Way. In this book, David Packard tells the simple yet extraordinary story of his life's work and of the truly exceptional company that he and Bill Hewlett started in a garage 55 years ago.

How to be Idle Tom Hodgkinson 2007-06-07 How to be Idle is Tom Hodgkinson's entertaining guide to reclaiming your right to be idle. As Oscar Wilde said, doing nothing is hard work. The Protestant work ethic has most of us in its thrall, and the idlers of this world have the odds stacked against them. But here, at last, is a book that can help. From Tom Hodgkinson, editor of the *Idler*, comes *How to be Idle*, an antidote to the work-obsessed culture which puts so many obstacles between ourselves and our dreams. Hodgkinson presents us with a laid-back argument for a new contract between routine and chaos, an argument for experiencing life to the full and living in the moment. Ranging across a host of issues that may affect the modern idler - sleep, the world of work, pleasure and hedonism, relationships, bohemian living, revolution - he draws on the writings of such well-known apologists for idleness as Dr Johnson, Oscar Wilde, Robert Louis Stevenson and Nietzsche. His message is clear: take control of your life and reclaim your right to be idle. 'Well written, funny and with a scholarly knowledge of the literature of laziness, it is both a book to be enjoyed at leisure and to change lives' *Sunday Times* 'In his life and in this book the author is 100 per cent on the side of the angels' *Literary Review* 'The book is so stuffed with wisdom and so stuffed with good jokes that I raced through it like a speed freak' *Independent on Sunday* Tom Hodgkinson is the founder and editor of *The Idler* and the author of *How to be Idle*, *How to be Free*, *The Idle Parent* and *Brave Old World*. In spring 2011 he founded *The Idler Academy* in London, a bookshop, coffeehouse and cultural centre which hosts literary events and offers courses in academic and practical subjects - from Latin to embroidery. Its motto is 'Liberty through Education'. Find out more at www.idler.co.uk.

The Innovator's Method Nathan R. Furr 2014 "Whether you call it "lean start-up," "design thinking," or "agile," a new method is revolutionizing how to successfully create, refine, and bring ideas to market--without traditional business planning. But because these ideas and techniques run counter to conventional managerial thinking and practice, managers in established organizations have difficulty implementing them. Innovation experts Nathan Furr and Jeff Dyer aim to change that. Based on field work with thousands of managers and validated insidedozens of companies, THE INNOVATOR'S METHOD shows when and how to apply a "lean start-up" approach to innovation in established businesses. THE INNOVATOR'S METHOD takes managers through these new practices for managing innovation, showing how to adapt them to their businesses and answering such questions as: How do we know this idea is worth pursuing? Does it solve the right problem for customers? Have we found the right solution? Do we have the right business model for our new offering? With detailed cases from the authors' work implementing these ideas with companies such as Intuit, NEC, P&G, Virgin Airlines, Kia, Folio, Citi, Hallmark, and Verizon, THE INNOVATOR'S METHOD picks up where Jeff Dyer's THE INNOVATOR'S DNA leaves off, showing how to test, validate and commercialize ideas with the lean and agile techniques that successful entrepreneurs use"--

The Linux Command Line William E. Shotts, Jr. 2012 You've experienced the shiny, point-and-click surface of your Linux computer—now dive below and explore its depths with the power of the command line. The Linux Command Line takes you from your very first terminal keystrokes to writing full programs in Bash, the most popular Linux shell. Along the way you'll learn the timeless skills handed down by generations of gray-bearded, mouse-shunning gurus: file navigation, environment configuration, command chaining, pattern matching with regular expressions, and more. In addition to that practical knowledge, author William Shotts reveals the philosophy behind these tools and the rich heritage that your desktop Linux machine has inherited from Unix supercomputers of yore. As you make your way through the book's short, easily-digestible chapters, you'll learn how to: * Create and delete files, directories, and symlinks * Administer your system, including networking, package installation, and process management * Use standard input and output, redirection, and pipelines * Edit files with Vi, the world's most popular text editor * Write shell scripts to automate common or boring tasks * Slice and dice text files with cut, paste, grep, patch, and sed Once you overcome your initial "shell shock," you'll find that the command line is a natural and expressive way to communicate with your computer. Just don't be surprised if your mouse starts to gather dust. A featured resource in the Linux Foundation's "Evolution of a SysAdmin"

Antistatic Sprays National Aeronautics and Space Adm Nasa 2018-10-25 Antistatic sprays from several different manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic sprays is presented in this document to aid in the evaluation process. Ming, James E. Goddard Space Flight Center

The Illustrated Guide to Assistive Technology & Devices Suzanne Robitaille 2009-12-08 A Doody's Core Title 2012 This new illustrated guide to assistive technologies and devices chronicles the use of AT/AD - technology used by individuals with disabilities to perform functions that might otherwise be difficult or impossible. This book empowers people to use assistive technologies to overcome some of their physical or mental limitations and have a more equal playing field. It includes real-life examples about how people with disabilities are using assistive technology (AT) to assist them in daily tasks, and discusses emotional issues related to AT/AD.

The Age of Low Tech Bihouix, Philippe 2020-10-21 People often believe that we can overcome the profound environmental and climate crises we face by smart systems, green innovations and more recycling. However, the quest for complex technological solutions, which rely on increasingly exotic and scarce materials, makes this unlikely. A best-seller in France, this English language edition introduces readers to an alternative perspective on how we should be marshalling our resources to preserve the planet and secure our future. Bihouix skilfully goes against the grain to argue that 'high' technology will not solve global problems and envisages a different approach to build a more resilient and sustainable society.
