Evolve Your Brain Joe Dispenza 2010-01-01 Why do we keep getting the same jobs, taking on the same relationships, and finding ourselves in the same emotional traps? Dr. Joe Dispenza not only teaches why people tend to repeat the same negative behaviors, he shows how readers can release themselves from these patterns of disappointment. With the dynamic combination of science and accessible how-to, Dispenza teaches how to use the most important tool in ones body and life—the brain. Featured in the underground smash hit of 2004, "What the Bleep Do We Know!?", Dispenza touched upon the brain's ability to become addicted to negative emotions. Now, in his empowering book Evolve Your Brain he explains how new thinking and new beliefs can literally rewire one's brain to change behavior, emotional reactions, and habit forming patterns. Most people are unaware of how addicted they are to their emotions, and how the brain perpetuates those addictions automatically. In short, we become slaves to our emotional addictions without even realizing it. By observing our patterns of thought, and learning how to 're-wire the brain' with new thought patterns, we can break the cycles that keep us trapped and open ourselves to new possibilities for growth, happiness and emotional satisfaction. Key Features A radical approach to changing addictive patterns and bad habits. Based on more than twenty years of research. Bridges the gap between science, spirituality and self-help—a formula that has proven success. Easy to understand and written for the average reader.

See You at Harry's Jo Knowles 2012-05-08 Starting middle school brings all the usual challenges — until the unthinkable happens, and Fern and her family must find a way to heal. Twelve-year-old Fern feels invisible. It seems as though everyone in her family has better things to do than pay attention to her: Mom (when she's not meditating) helps Dad run the family restaurant; Sarah is taking a gap year after high school; and Holden pretends that Mom and Dad and everyone else doesn't know he's gay, even as he fends off bullies at school. Then there's Charlie: three years old, a "surprise" baby, the center of everyone's world. He's devoted to Fern, but he's annoying, too, always getting his way, always dirty, always commanding attention. If it wasn't for Ran, Fern's calm and positive best friend, there'd be nowhere to turn. Ran's mantra, "All will be well," is soothing in a way that nothing else seems to be. And when Ran says it, Fern can almost believe it's true. But then tragedy strikes- and Fern feels not only more alone than ever, but also responsible for the accident that has wrenched her family apart. All will not be well. Or at least all will never be the same.

[Behavioral Finance: The Second Generation](#) Meir Statman 2019-12-02 Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

and aggressive when faced with the simplest decisions? Does your bold, energetic child have trouble focusing on basic tasks? Millions of children--one in five--have what psychologist Lucy Jo Palladino, Ph.D., calls the Edison trait: dazzling intelligence, an active imagination, a free-spirited approach to life, and the ability to drive everyone around them crazy. Named after Thomas Edison--who flunked out of school only to harness his talents and give the world some of its finest inventions--the Edison trait is on the rise in our younger generation. The heart of the issue is that they think divergently--they overflow with many ideas--while schools, organized activities, and routines of daily living reward convergent thinking, which focuses on one idea at a time. Drawing on examples from more than two decades of private practice, Dr. Palladino helps us cope with this challenging aspect of our child's intellect and personality, explaining in clear terms: - The three Edison-trait personality types: dreamers, discoverers, and dynamos - The eight steps to understanding, reaching, and teaching your Edison-trait child - The connection between the Edison trait and A.D.D.

Parenting in the Age of Attention Snatchers Lucy Jo Palladino 2015-04-28 Are your kids unable to step away from the screens? Here is a practical, step-by-step guide that gives parents the tools to teach children, from toddlers to teens, how to gain control of their technology use. They want their kids to be competent and competitive in their use of technology, but they also want to prevent the attention problems that can develop from overuse. Lucy Jo Palladino shows that the key is to help kids build awareness and control over their own attention, and in this guide she gives parents the tools to do exactly that, in seven straightforward, evidence-based steps. This approach can be modified for kids of all ages. Parents will also learn the critical difference between voluntary and involuntary attention, new findings about brain development, and what puts children at risk for attention disorders.
