World Heritage Angkor and Beyond Brigitta Hauser-Schäublin 2011 "Angkor, the temple and palace complex of the ancient Khmer capital in Cambodia is one of the world's most famous monuments. Hundreds of thousands of tourists from all over the globe visit Angkor Park, one of the finest UNESCO World Heritage Sites, every year. Since its UNESCO listing in 1992, the Angkor region has experienced an overwhelming mushrooming of hotels and restaurants; the infrastructure has been hardly able to cope with the rapid growth of mass tourism and its needs. This applies to the access and use of monument sites as well. The authors of this book critically describe and analyse the heritage nomination processes in Cambodia, especially in the case of Angkor and the temple of Preah Vihear on the Cambodian/Thai border. They examine the implications the UNESCO listings have had with regard to the management of Angkor Park and its inhabitants on the one hand, and to the Cambodian/Thai relationships on the other. Furthermore, they address issues of development through tourism that UNESCO has recognised as a welcome side-effect of heritage listings. They raise the question whether development through tourism deepens already existing inequalities rather than contributing to the promotion of the poor"--Publisher's description.

Shadow Education Mark Bray 2012-05-01 In all parts of Asia, households devote considerable expenditures to private supplementary tutoring. This tutoring may contribute to students' achievement, but it also maintains and exacerbates social inequalities, diverts resources from other uses, and can contribute to inefficiencies in education systems. Such tutoring is widely called shadow education, because it mimics school systems. As the curriculum in the school system changes, so does the shadow. This study documents the scale and nature of shadow education in different parts of the region. Shadow education has been a major phenomenon in East Asia and it has far-reaching economic and social implications.

Kasher in the Rye Moshe Kasher 2012-03-28 A hopeful and inspiring "act of comedic magic" from comedian—and now memoirist!—Moshe Kasher (Artie Lange, #1 New York Times bestselling author of *Too Fat to Fish*). Rising young comedian Moshe Kasher is lucky to be alive. He started using drugs when he was just 12. At that point, he had already been in psychoanalysis for 8 years. By the time he was 15, he had been in and out of several mental institutions, drifting from therapy to rehab to arrest to...you get the picture. But *Kasher in the Rye* is not an "eye opener" to the horrors of addiction. It's a hilarious memoir about the absurdity of it all. When he was a young boy, Kasher's mother took him on a vacation to the West Coast. Well it was more like an abduction. Only not officially. She stole them away from their father and they moved to Oakland, California. That's where the real fun begins, in the war zone of Oakland Public Schools. He was more than just out of control—his mother walked him around on a leash, which he chewed through and ran away. Those early years read like part Augusten Burroughs, part David Sedaris, with a touch of Jim Carrol...but a lot more Jewish. In fact, Kasher later spends time in a Brooklyn Hasidic community. Then came addiction... Brutally honest and laugh-out-loud funny, Kasher's first literary endeavor finds humor in even the most horrifying situations.

Play and Child Development Joe L. Frost 2011-05 More than any other textbook on the market, *Play and Child Development, Fourth Edition*, ties play directly to child development. The authors address the full spectrum of play-related topics and seamlessly blend research, theory, and practical applications throughout this developmentally-based resource. Readers will learn about historical, theoretical, and practical approaches to promoting development through integrated play and learning approaches across various age or developmental levels. The book analyzes play theories and play therapy; presents a history of play; and discusses current play trends. It explores ways to create safe play environments for all children, and how to weave play into school curricula. Finally, the authors examine the role of adults in leading and encouraging children's natural tendencies toward learning by playing. Special coverage includes a full chapter on play and children with disabilities, and the value of field trips in supporting learning. This edition offers expanded and/or updated coverage on evidence based play theory, child development, play environments, and early play-based curricula for children of all abilities in various learning contexts. All content in the text is purposefully arranged to guide its readers through key and core topics leading to a comprehensive understanding of play intended to help prepare pre-service teachers to lead and support children's play in a number of contexts: preschools, elementary schools, park systems, and research programs.

Guiding Principles for Evaluators William R. Shadish 1995 The American Evaluation Association (AEA) board of directors formed a task force to create the AEA Guiding Principles for Evaluators in November 1992. The task force developed a set of guiding principles for evaluators and then saw those principles through the many steps that eventually resulted in their adoption by vote of the membership of AEA. The present volume documents and critiques those principles. It first records the history of task force efforts, with special attention to the most important conceptual issues that arose. Then, after presenting the principles themselves, the authors discuss and critique both the strengths and weaknesses of the Guiding Principles for Evaluators. These chapters fall into two categories: discussions at a very general level about the role of such principles in our profession, and problems that will arise in applying the principles in practice. The volume ends with a look to the future, to the sorts of issues and activities that we should keep in mind for the continued use and development of these principles.

Learning Analytics Gwo-Jen Hwang 2018-12-18 Learning analytics is one of the most important research issues in the field of educational technology. By analyzing logs and records in educational databases and systems, it can provide useful information to teachers, learners, and decision makers – information which they can use to improve teaching strategies, learning performances, and educational policies. However, it is a great challenge for most researchers to efficiently analyze educational data in a meaningful way. This book presents various learning analytics approaches and applications, including the process of determining the coding scheme, analyzing the collected data, and interpreting the findings. This book was originally published as a special issue of *Interactive Learning Environments*.

Contemporary Socio-Cultural and Political Perspectives in Thailand Pranee Liamputtong 2014-01-13 This volume examines contemporary Thailand. It captures aspects of Thai society that have changed dramatically over the past years and that have turned Thailand into a society that is different from what most people outside the country know and expect. The social transition of Thailand has been marked by economic growth, population restructuring, social and cultural development, political movements, and many reforms including the national health care system. The book covers the social, cultural, and economic changes as well as political situations. It discusses both historical contexts and emerging issues. It includes chapters on social and public health concerns, and on ethnicity, gender, sexuality and social class. Most chapters use information from empirical-based and historical research. They describe real life experiences of the contributors and Thai people who participated in the research.

Team Teaching and Team Learning in the Language Classroom Akira Tajino 2015-12-14 This book reignites discussion on the importance of collaboration and innovation in language education. The pivotal difference highlighted in this volume is the concept of team learning through collaborative relationships such as team teaching. It explores ways in which team learning happens in ELT environments and what emerges from these explorations is a more robust concept of team learning in language education. Coupled with this deeper understanding, the value of participant research is emphasised by defining the notion of 'team' to include all participants in the educational experience. Authors in this volume position practice ahead of theory as they struggle to make sense of the complex phenomena of language teaching and learning. The focus of this book is on the nexus between ELT theory and practice as viewed through the lens of collaboration. The volume aims to add to the current knowledge base in order to bridge the theory-practice gap regarding collaboration for innovation in language classrooms.

Intelligent Tutoring Systems Beverly Woolf 2008-06-29 This book constitutes the refereed proceedings of the 9th International Conference on Intelligent Tutoring Systems, ITS 2008, held in Montreal, Canada, in June 2008. Feminisms in Education Gaby Weiner 1994 This timely book takes stock of past and present feminist educational thinking and practice in Britain. It is the range and clarity of the descriptions of past feminist activities in education, combined with the complexities of contemporary feminist ideas, that make this book essential reading for a wide range of people. Wiener's style is direct and intellectually interactive.

Reviews of National Policies for Education Organisation for Economic Co-operation and Development 1984 A team of examiners from the Organisation for Economic Cooperation and Development (OECD) reviews Portugal's education system in a three-part report. Part One begins with the consequences of the 1974 revolution, Portugal's economic problems, its impending attachment to the European Economic Community, and rising public expectations about education. It continues with criticism of the Ministry of Education, which is overstaffed and has duplicate functions. The examiners propose reduction of branches and suggest the establishment of a national education advisory council and closer relations with other government agencies. A high priority for the compulsory school-level education (four primary and two preparatory grades) is improvement of standards in rural areas. Accepting the future extension of compulsory schooling from 6 to 9 years, the examiners counsel step-by-step reform of the school structure and curriculum. Education of 16-to-19 year olds is a problematic issue since upper-secondary schools are not providing adequate vocational courses. The examiners feel a solution is for Portugal to adopt a comprehensive education and training policy for that age group implemented jointly by the Ministries of Education and Labor. Part Two of the report includes a record of the review meeting between the OECD examiners and the Minister of Education and his delegates and addresses five areas of concern. The third part is a summary of the Ministry of Education's Background Report of the education system in Portugal. (MD)

Homeland Earth Edgar Morin 1999 Edgar Morin, one of the leading figures in European thought, challenges us to think differently about our past, our present, and our future. Morin points to the development of a planetary culture that is not homogenizing or fragmented, and the need to recognize complexity, uncertainty, and ambiguity as potential sources of creativity, learning, and transformation. Given the uncertainty of our journey, Morin presents "complex thought" as a way to overcome the "crisis of the future," and stresses the importance of solidarity.

Education in Thailand Gerald W. Fry 2018-11-01 This interdisciplinary book offers a critical analysis of Thai education and its evolution, providing diverse perspectives and theoretical frameworks. In the past five decades Thailand has seen impressive economic success and it is now a middle-income country that provides development assistance to poorer countries. However, educational and social development have lagged considerably behind its globally recognized economic success. This comprehensive book covers each level of education, such as higher and vocational/technical education, and such topics as internationalization, inequalities and disparities, alternative education, non-formal and informal education, multilingual education, educational policy and planning, and educational assessment. The 25 Thai and 8 international contributors to the volume include well-known academics and practitioners. Thai education involves numerous paradoxes, which are identified and explained. While Thailand has impressively expanded its educational system quantitatively with much massification, quality problems persist at all levels. As such, the final policy-oriented summary chapter suggests strategies to enable Thailand to escape "the middle income trap" and enhance the quality of its education to ensure its long-term developmental success.
