The Future Inheritance of Land in the Pauline Epistles Miguel G. Echevarria Jr. 2019-01-25 The Apostle Paul's vision of eternity is centered on the inheritance theme. Although Paul rarely unpacks this concept, he employs the inheritance in a manner that encompasses the hope of a renewed cosmos promised to Abraham and his descendants. Thus, the apostle does not redefine a theme grounded in the Old Testament and Second Temple literature--as if it now referred to heaven or some other spiritualized existence. He expects what every pious Jew expected--the tangible fulfillment of the promise, when at last God's people will dwell in a land where they will experience rest under the rule of Messiah. What Paul clarifies is that those who are "in Christ" are the beneficiaries of the inheritance. Although believers do not currently possess what has been promised to them, they have the hope that the Spirit will lead them on a new exodus through the wilderness of the present sinful age until they inherit the coming world.

Promised Lands David M. Wrobel 2002 Whether seen as a land of opportunity or as paradise lost, the American West took shape in the nation's imagination with the help of those who wrote about it; but two groups who did much to shape that perception are often overlooked today. Promoters trying to lure settlers and investors to the West insisted that the frontier had already been tamed--that the only frontiers remaining were those of opportunity. Through posters, pamphlets, newspaper articles, and other printed pieces, these boosters literally imagined places into existence by depicting backwater areas as settled, culturally developed regions where newcomers would find none of the hardships associated with frontier life. Quick on their heels, some of the West's original settlers had begun publishing their reminiscences in books and periodicals and banding together in pioneer societies to sustain their conception of frontier heritage. Their selective memory focused on the savage wilderness they had tamed, exaggerating the past every bit as much as promoters exaggerated the present. Although they are generally seen today as unscrupulous charlatans and tellers of tall tales, David Wrobel reveals that these promoters and reminiscers were more significant than their detractors have suggested. By exploring the vast literature produced by these individuals from the end of the Civil War through the 1920s, he clarifies the pivotal impact of their works on our vision of both the historic and mythic West. In examining their role in forging both sense of place within the West and the nation's sense of the West as a place, Wrobel shows that these works were vital to the process of identity formation among westerners themselves and to the construction of a "West" in the national imagination. Wrobel also sheds light on the often elitist, sometimes racist legacies of both groups through their characterizations of Native Americans, African Americans, Mexican Americans, and Asian Americans. In the era Wrobel examines, promoters painted the future of each western place as if it were already present, while the old-timers

preserved the past as if it were still present. But, as he also demonstrates, that West has not really changed much: promoters still tout its promise, while old-timers still try to preserve their selective memories. Even relatively recent western residents still tap into the region's mythic pioneer heritage as they form their attachments to place. Promised Lands shows us that the West may well move into the twenty-first century, but our images of it are forever rooted in the nineteenth.

Theology of the Oral Torah Jacob Neusner 1999-04-10 In The Theology of the Oral Torah Neusner crafts the central conceptions of rabbinic Judaism into a rigorous, coherent argument by setting forth four cogent principles: that God formed creation in accord with a plan which the Torah reveals; that the perfection of creation is signified by the conformity of human affairs to a few enduring paradigms that transcend change; that Israel's condition, public and personal, is indicative of flaws in creation; and that God will ultimately restore the perfection embodied in his plan for creation. A masterful and original construction of theology of rabbinic Judaism, Neusner's story of the Oral Torah is also remarkably familiar - the emphasis is still on man's sin and God's response, God's justice and mercy, and the human mirroring of God through the possession of the power of will. The Theology of the Oral Torah is part of Neusner's ongoing major project - the construction of theology of rabbinic Judaism - a project which rivals in its scope that of the great Maimonides or, in Christian theology, that of Thomas Aquinas's Summa.

The Franciscan Invention of the New World Julia McClure 2016-11-30 This book examines the story of the 'discovery of America' through the prism of the history of the Franciscans, a socio-religious movement with a unique doctrine of voluntary poverty. The Franciscans rapidly developed global dimensions, but their often paradoxical relationships with poverty and power offer an alternate account of global history. Through this lens, Julia McClure offers a deeper history of colonialism, not only by extending its chronology, but also by exploring the powerful role of ambivalence in the emergence of colonial regimes. Other topics discussed include the legal history of property, the complexity and politics of global knowledge networks, the early (and neglected) history of the Near Atlantic, and the transatlantic inquisition, mysticism, apocalypticism, and religious imaginations of place.

East of Eden John Steinbeck 2002-02-05 A masterpiece of Biblical scope, and the magnum opus of one of America's most enduring authors, in a commemorative hardcover edition In his journal, Nobel Prize winner John Steinbeck called East of Eden "the first book," and indeed it has the primordial power and simplicity of myth. Set in the rich farmland of California's Salinas Valley, this sprawling and often brutal novel follows the intertwined destinies of two families—the Trasks and the Hamiltons—whose generations helplessly reenact the fall of Adam and Eve and the poisonous rivalry of Cain and Abel. The masterpiece of Steinbeck's later years, East of Eden is a work in which Steinbeck created his most mesmerizing characters and explored his most enduring themes: the mystery of identity, the inexplicability of love, and the murderous consequences of love's absence. Adapted for the 1955 film directed by Elia Kazan introducing James Dean, and read by thousands as the book that brought Oprah's Book Club back, East of Eden has remained vitally present in American culture for over half a century.

The Politics of War Memory and Commemoration T.G. Ashplant 2013-01-11 War memory and commemoration have had increasingly high profiles in public and academic debates in recent years. This volume examines some of the social changes which have led to this development, among them the passing of the two World Wars from survivor into cultural memory. Focusing on the politics of war memory and commemoration, the book illuminates the struggle to install particular memories at the centre of a cultural world, and offers an extensive argument about how the politics of commemoration practices should be understood.

The San Diego World's Fairs and Southwestern Memory, 1880-1940 Matthew Bokovoy 2005-11-01 In the American Southwest, no two events shaped modern Spanish heritage more profoundly than the San Diego Expositions of 1915-16 and 1935-36. Both San Diego fairs displayed a portrait of the Southwest and its peoples for the American public. The Panama-California Exposition of 1915-16 celebrated Southwestern pluralism and gave rise to future promotional events including the Long Beach Pacific Southwest Exposition of 1928, the Santa Fe Fiesta of the 1920s, and John Steven McGroarty's The Mission Play. The California-Pacific International Exposition of 1935-36 promoted the Pacific Slope and the consumer-oriented society in the making during the 1930s. These San Diego fairs distributed national images of southern California and the Southwest unsurpassed in the early twentieth century. By examining architecture and landscape, American Indian shows, civic pageants, tourist imagery, and the production of history for celebration and exhibition at each fair, Matthew Bokovoy peels back the rhetoric of romance and reveals the legacies of the San Diego World's Fairs to reimagine the Indian and Hispanic Southwest. In tracing how the two fairs reflected civic conflict over an invented San Diego culture, Bokovoy explains the emergence of a myth in which the city embraced and incorporated native peoples, Hispanics, and Anglo settlers to benefit its modern development.

Land of Eden William H. Wesley 2008 About the Author: William Henry Wesley III, my father, is generally a quiet man, so some may think at first he's shy or timid. But don't be fooled by the silence! When he chooses to speak, his knowledge, wisdom and quirky sense of humor shine brightly into this world of the mundane. He's one of those people one can tell knows far more than he ever lets on. I grew up listening to my father's tales of his childhood at Eden. In my mind Eden was a place of magic and wonder, almost like a fairytale land. My father was a great storyteller and I loved listening to his same old stories over and over until now I know them all by heart. I am thrilled that he wrote this book; now the whole world can read these stories I know and love. This book is but a fraction of the stories from his past. Here he tried to focus on Eden, but there are many more tales and adventures my father could share from all around the Florida panhandle and beyond. I hope that you, the reader, will enjoy this book as much as I enjoyed sitting in my dad's lap as a little

girl, listening with delight to my daddy's yarns of Eden. Melinda Wesley Hinton

The Training Place of Mankind David Bergsland 2013-01-30 End the confusion! God's people have been sold a bill of goods. If you think about it at all, evolution could not be true. If this young earth is really billions of years old, then God is a liar. You know that isn't true. This book tells the tale of God's creation lovingly, by a man who only recently came to his senses. It had been obvious when he visited the Grand Canyon that this hadn't happened over countless millennia. It had happened quickly with a massive flood of water. God made man. We didn't come from apes. The first two chapters of Genesis make excellent scientific sense when you understand how God did it and why He did it in the order it was done. It's amazing how clear it is when a believer explains how it works. Join David on a glorious trip through the 7,000 years of creation. Yes, there is only one millennium left for this one. Then this training place is dissolved in fire and replaced with what we commonly call heaven. God calls it a new creation. Rejoice in the glory of what He has done for us!

Sociological Thought Nahla Abdo 1998-10-28 Sociological Thought: Beyond Eurocentric Theory is designed to provide students of sociology with an alternative vision of social theory. In an exciting and original introduction to the book, Abdo provides an innovative critique of the Eurocentric and male-oriented nature of conventional sociological textbooks, and provides us with a new approach to understanding the field. The horizons of social theory are expanded by the inclusion of a chapter by Rosa Luxemburg and a chapter by the fourteenth century Arab/North African scholar Ibn Khaldun.

High Dartmoor, Land and People Eric Hemery 1983 This book about England's last great wilderness, as it is often called, is a systematic topographical and historical survey of Dartmoor by watersheds, and the first to deal comprehensively with the region since the celebrated guide of 1908 by William Crossing. Every river country has its map showing courses and names of even the smallest tributary streams. Helpful features are the glossary of terms, in which an explanation is given of every type of feature described in the text, and the illustrated note on the physical pattern of the valleys, which makes clear that, far from being an expanse of moorland conceived in a haphazard fit by nature, Dartmoor is possessed of a physical symmetry. Never before has the Moor been meticulously recorded in word and picture.

Memory Lands Christine M. DeLucia 2018-01-09 Noted historian Christine DeLucia offers a major reconsideration of the violent seventeenth-century

conflict in northeastern America known as King Philip's War, providing an alternative to Pilgrim-centric narratives that have conventionally dominated the histories of colonial New England. DeLucia grounds her study of one of the most devastating conflicts between Native Americans and European settlers in early America in five specific places that were directly affected by the crisis, spanning the Northeast as well as the Atlantic world. She examines the war's effects on the everyday lives and collective mentalities of the region's diverse Native and Euro-American communities over the course of several centuries, focusing on persistent struggles over land and water, sovereignty, resistance, cultural memory, and intercultural interactions. An enlightening work that draws from oral traditions, archival traces, material and visual culture, archaeology, literature, and environmental studies, this study reassesses the nature and enduring legacies of a watershed historical event.

Memories of Eden Violette Shamash 2016-03-15 According to legend, the Garden of Eden was located in Iraq, and for millennia, Jews resided peacefully in metropolitan Baghdad. Memories of Eden: A Journey Through Jewish Baghdad reconstructs the last years of the oldest Jewish Diaspora community in the world through the recollections of Violette Shamash, a Jewish woman who was born in Baghdad in 1912, sent to her daughter Mira Rocca and son-in-law, the British journalist Tony Rocca. The result is a deeply textured memoir—an intimate portrait of an individual life, yet revealing of the complex dynamics of the Middle East in the twentieth century. Toward the end of her long life, Violette Shamash began writing letters, notes, and essays and sending them to the Roccas. The resulting book begins near the end of Ottoman rule and runs through the British Mandate, the emergence of an independent Iraq, and the start of dictatorial government. Shamash clearly loved the world in which she grew up but is altogether honest in her depiction of the transformation of attitudes toward Baghdad's Jewish population. Shamash's world is finally shattered by the Farhud, the name given to the massacre of hundreds of Iraqi Jews over three days in 1941. An event that has received very slight historical coverage, the Farhud is further described and placed in

context in a concluding essay by Tony Rocca.
