After Method John Law 2004-08-12 John Law argues that methods don't just describe social realities but are also involved in creating them. The implications of this argument are highly significant. If this is the case, methods are always political, and it raises the question of what kinds of social realities we want to create. Most current methods look for clarity and precision. It is usually said that only poor research produces messy findings, and the idea that things in the world might be fluid, elusive, or multiple is unthinkable. Law's startling argument is that this is wrong and it is time for a new approach. Many realities, he says, are vague and ephemeral. If methods want to know and help to shape the world, then they need to reinvent themselves and their politics to deal with mess. That is the challenge. Nothing less will do.

Quantitative Techniques Terence Lucey 2002 This text is especially relevant to students studying quantitative techniques as part of business, management and/or finance on undergraduate and professional courses, especially: ACCA; CIMA; CIPFA; ICA, IOB, ICAEW. This introductory interdisciplinary textbook covers all the major topics involved at the interface between business and management on the one hand and mathematics and statistics on the other. Topics dealt with include logistics, finance, production and operations management, and economics. Doing Your Qualitative Psychology Project Sarah Riley 2012-04-04 This book is for students who are about to embark on a qualitative research project as part of their psychology degree. While there are a number of books on qualitative psychological research, Doing Your Qualitative Psychology Project is unique as it leads you step-by-step through the process of doing your project and writing your dissertation. The focus throughout is on how to make your project excellent! Editors Cath Sullivan, Stephen Gibson and Sarah C.E. Riley focus on the steps involved in completing a qualitative dissertation and on the decisions that you'll need to make as you go along.

Model to Monetarily Aggregate Risks of Procurement to Support Decision Makers Philipp von Cube 2019-11-05 The present thesis provides a model to monetarily aggregate procurement risks to support decision makers. A material flow oriented view forms the fundament of the model. The model is designed to aggregate delay, quality and cost related procurement risks considering their uncertainty. Procurement risks are aggregated to form a monetary risk distribution. Decision-makers can select procurement strategies that are adequate for their risk situation, depending on their affinity for risk to mitigate procurement risks.

Research Methods for Everyday Life Scott W. VanderStoep 2008-12-22 This book offers an innovative introduction to social research. The book explores all stages of the research process and it features both quantitative and qualitative methods. Research design topics include sampling techniques, choosing a research design, and determining research question that inform public opinion and direct future studies. Throughout the book, the authors provide vivid and engaging examples that reinforce the reading and understanding of social science research. "Your Turn" boxes contain activities that allow students to practice research skills, such as sampling, naturalistic observation, survey collection, coding, analysis, and report writing.

Quantitative Ethnography David Williamson Shaffer 2017 How can we make sense of make sense of the deluge of information in the digital age? The new science of Quantitative Ethnography dissolves the boundaries between quantitative and qualitative research to give researchers tools for studying the human side of big data: to understand not just what data says, but what it tells us about the people who created it. Thoughtful, literate, and humane, Quantitative Ethnography integrates data-mining, discourse analysis, psychology, statistics, and ethnography into a brand-new science for understanding what people do and why they do it. Packed with anecdotes, stories, and clear explanations of complex ideas, Quantitative Ethnography is an engaging introduction to research methods for students, an introduction to data science for qualitative researchers, and an introduction to the humanities for statisticians--but also a compelling philosophical and intellectual journey for anyone who wants to understand learning, culture and behavior in the age of big data.

Qualitative Research in Psychology Paul Marc Camic 2003-01-01 Qualitative methodologies and the different paradigms which guide them can be seen as both an alternative and complementary approach to quantification and positivism in social, personality, developmental, health, clinical, couselling, community and school psychology. Qualitative methodology seen as an alternative approach seeks to answer questions that cannot be answered through quantification, random sampling, probability testing and

other measures, which seek to control the environment of the participant.

Longitudinal Qualitative Research Johnny Saldaña 2003 Professor Saldaña briefly discusses the basic elements of longitudinal qualitative data, examines time and change in longitudinal qualitative studies, and then offers sixteen specific questions through which researchers may approach the analysis of longitudinal qualitative data.

A Connected Curriculum for Higher Education Dilly Fung 2017-06-07 Is it possible to bring university research and student education into a more connected, more symbiotic relationship? If so, can we develop programmes of study that enable faculty, students and 'real world' communities to connect in new ways? In this accessible book, Dilly Fung argues that it is not only possible but also potentially transformational to develop new forms of research-based education. Presenting the Connected Curriculum framework already adopted by UCL, she opens windows onto new initiatives related to, for example, research-based education, internationalisation, the global classroom, interdisciplinarity and public engagement. A Connected Curriculum for Higher Education is, however, not just about developing engaging programmes of study. Drawing on the field of philosophical hermeneutics, Fung argues how the Connected Curriculum framework can help to create spaces for critical dialogue about educational values, both within and across existing research groups, teaching departments and learning communities. Drawing on vignettes of practice from around the world, she argues that developing the synergies between research and education can empower faculty members and students from all backgrounds to contribute to the global common good.

Costing Terence Lucey 2002 This text covers the principles, techniques and methods involved in cost accountancy. It provides full coverage of the latest professional and college syllabuses for cost accountancy.

Inventing Adulthoods Rachel Thomson, Janet Holland, Sheena McGrellis, Sheila Henderson, Sue Sharpe 2006-11-15 'The series Youth: Perspectives and Practice provides a distinctive and rare combination of expert commentary, new research, original theorising and critical reflection on how we should understand youth and work with young people. These books deserve a wide readership the way they are written and organised will make them particularly appealing to students' - "Professor Robert MacDonald, University of Teesside " Inventing Adulthoods offers a ground-breaking new perspective on young peoples' experiences of growing up at the turn of the 21st century, arguing that a biographical approach is vital to understanding the holistic and dynamic character of their lives. Based on a study of a diverse group of young people over a 10 year period, the book explores high profile policy issues: education, employment, drugs, cultures of violence and well-being. It also considers the significance of those things that mean most to young people themselves: mobility, home, belonging, intimacy and social life. The book is written in a lively and engaging style and, through case studies and interviews, examines: "the impact that social factors such as gender, class, sexuality, religion, disability and family have on life opportunities; and "connections between young people's lives, social policy frameworks and practice applications. Inventing Adulthoods is an invaluable resource to anyone interested in the lives of young people. Thought-provoking yet accessible, this book is ideal for students in youth studies and education, as it is for youth workers, social workers and other practitioners. Inventing Adulthoods is the set book for the Open University course "Youth:

Perspectives and Practice" (KE308). Sheila Henderson is a Visiting Fellow at London South Bank University. Janet Holland is Professor of Social Research and Co-director of the Families and Social Capital ESRC Research Group at London South Bank University. Sheena McGrellis is a Senior Research Fellow in the Families Group, but is based at University of Ulster. Sue Sharpe is a Visiting Fellow at London South Bank University. Rachel Thomson is Professor of Social Research in the Faculty of Health and Social Care at The Open University.

Reflective Practice in Nursing Lioba Howatson-Jones 2016-02-27 Would you like to develop some strategies to manage knowledge deficits, near misses and mistakes in practice? Are you looking to improve your reflective writing for your portfolio, essays or assignments? Reflective practice enables us to make sense of, and learn from, the experiences we have each day and if nurtured properly can provide skills that will you come to rely on throughout your nursing career. Using clear language and insightful examples, scenarios and case studies the third edition of this popular and bestselling book shows you what reflection is, why it is so important and how you can use it to improve your nursing practice. Key features: · Clear and straightforward introduction to reflection directly written for nursing students and new nurses · Full of activities designed to build confidence when using reflective practice · Each chapter is linked to relevant NMC Standards and Essential Skills Clusters

Cochrane Handbook for Systematic Reviews of Interventions Julian P. T. Higgins 2008-11-24 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

What is Qualitative Interviewing? Rosalind Edwards 2013-11-07 What is Qualitative Interviewing? is an accessible and comprehensive 'what is' and 'how to' methods book. It is distinctive in emphasising the importance of good practice in understanding and undertaking qualitative interviews within the framework of a clear philosophical position. Rosalind Edwards and Janet Holland provide clear and succinct explanations of a range of philosophies and theories of how to know about the social world, and a thorough discussion of how to go about researching it using interviews. A series of short chapters explain and illustrate a range of interview types and practices. Drawing on their own and colleagues' experiences Holland and Edwards provide real

research examples as informative illustrations of qualitative interviewing in practice, and the use of a range of creative interview tools. They discuss the use of new technologies as well as tackling enduring issues around asking and listening and power dynamics in research. Written in a clear and accessible style the book concludes with a useful annotated bibliography of key texts and journals in the field. What is Qualitative Interviewing? provides a vital resource for both new and experienced social science researchers across a range of disciplines.

Advances in Mixed Methods Research Manfred Max Bergman 2008-05-06 Advances in Mixed Methods Research provides an essential introduction to the fast-growing field of mixed methods research. Bergman's book examines the current state of mixed-methods research, exploring exciting new ways of conceptualizing and conducting empirical research in the social and health sciences. Contributions from the world's leading experts in qualitative, quantitative, and mixed methods approaches are brought together, clearing the way for a more constructive approach to social research. These contributions cover the main practical and methodological issues and include a number of different visions of what mixed methods research is. The discussion also covers the use of mixed methods in a diverse range of fields, including sociology, education, politics, psychology, computational science and methodology. This book represents an important contribution to the ongoing debate surrounding the use of mixed methods in the social sciences and health research, and presents a convincing argument that the conventional, paradigmatic view of qualitative and quantitative research is outdated and in need of replacement. It will be essential reading for anyone actively engaged in qualitative, quantitative and mixed methods research and for students of social research methods. Manfred Max Bergman is Chair of Methodology and Political Sociology at the University of Basel.

The Theory and Practice of Online Learning Terry Anderson 2008 "Neither an academic tome nor a prescriptive 'how to' guide, The Theory and Practice of Online Learning is an illuminating collection of essays by practitioners and scholars active in the complex field of distance education. Distance education has evolved significantly in its 150 years of existence. For most of this time, it was an individual pursuit defined by infrequent postal communication. But recently, three more developmental generations have emerged, supported by television and radio, teleconferencing, and computer conferencing. The early 21st century has produced a fifth generation, based on autonomous agents and intelligent, database-assisted learning, that has been referred to as Web 2.0. The second edition of "The Theory and Practice of Online Learning" features updates in each chapter, plus four new chapters on current distance education issues such as connectivism and social software innovations."--BOOK JACKET.

Entrepreneurial Finance for MSMEs Joshua Yindenaba Abor 2016-11-02 This book provides a framework for understanding micro, small and medium sized enterprises (MSMEs) as important contributors to economic growth. By examining the economic and investment decisions behind these businesses, the author shows how managers of MSMEs can add value to the firm by applying managerial finance tools. Early chapters establish the basic tenets of new venture development and financing and explore the economic environment that business-owners inhabit, focusing on venture capital, microfinance intervention, and public sector interventions. Later chapters guide the reader through the process of financial planning and forecasting, and valuation, finishing

with insights into how to harvest investments and make sound financial decisions. The book has interdisciplinary appeal and offers a timely consideration of MSMEs in developing economies. It will be valuable reading for all interested in the management and development of small businesses, the finance of entrepreneurship and policy affecting small and medium sized enterprises.

Introduction to Research in Education Donald Ary 2006 An introduction to research in education text, this book helps students to master the basic competencies necessary to understand and evaluate the research of others, and shows them how to plan and conduct original research.

What is Narrative Research? Molly Andrews 2015-01-15 This book will bring together ideas about narrative from a variety of contexts across the social sciences and synthesize understandings of the field. Rather than focusing on theory, the book will examine how narrative research is conducted and applied.

The SAGE Handbook of Social Research Methods Pertti Alasuutari 2008-03-25 The SAGE Handbook for Social Research Methods is a must for every social-science researcher. It charts the new and evolving terrain of social research methodology, covering qualitative, quantitative, and mixed methods in one volume. The Handbook includes chapters on each phase of the research process: research design, methods of data collection, and the processes of analyzing and interpreting data. As its editors maintain, there is much more to research than learning skills and techniques; methodology involves the fit between theory, research questions, research design, and analysis.

Research Methods in Health Ann Bowling 2002-01 This second edition has been revised and updated to reflect key methodological developments in health research. It is a comprehensive, easy to read, guide to the range of methods used to study and evaluate health and health services. It describes the concepts and methods used by the main disciplines involved in health research, including: demography, epidemiology, health economics, psychology and sociology.

How to Do Media and Cultural Studies Jane Stokes 2003-02-24 Providing a student guide to the process of research and writing for media and cultural studies, the author covers both quantitative and qualitative methods and includes a list of useful library resources and essential Web sites.

Addressing Adversity Marc Bush 2018-02-08 An edited collection of papers published by YoungMinds and funded by Health Education England. With 1 in 3 adult mental health conditions related directly to adverse childhood experiences, it is vital that we understand the impact that adversity and trauma can have on the mental health and wellbeing of young people, and how we can strengthen resilience and support recovery. Addressing Adversity presents evidence, insight, direction and case studies for commissioners, providers and practitioners in order to stimulate further growth in adversity and trauma-informed care, and spark innovation and good practice across England. Section 1: Understanding adversity, trauma and resilience includes evidence and analysis of the impact that adverse childhood experiences and trauma have on children and young people's mental health and wider outcomes across the lifecourse. Section 2: Addressing childhood adversity and trauma includes insights from the NHS in England, organisations and clinicians working with children and young people who have experienced forms of adversity and trauma. Section 3: Emerging good practice includes insight, case studies and working examples of adversity and trauma-informed service models being developed across England. The collection ends with an agenda for change, calling on all Directors of Public Health, commissioners and providers to make adversity and trauma-informed care a priority in their locality.

How Tobacco Smoke Causes Disease 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews

the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

A research handbook for patient and public involvement researchers Penny Bee 2018-10-01 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. This book is written for patients and members of the public who want to understand more about the approaches, methods and language used by health-services researchers. Patient and public involvement (PPI) in research is now a requirement of most major health-research programmes, and this book is designed to equip these individuals with the knowledge and skills necessary for meaningful participation. Edited by award-winning mental-health researchers, the book has been produced in partnership with mental-health-service users and carers with experience of research involvement. It includes personal reflections from these individuals alongside detailed information on quantitative, qualitative and health-economics research methods.

Meta-Ethnography George W. Noblit 1988-02 How can ethnographic studies be generalized, in contrast to concentrating on the individual case? Noblit and Hare propose a new method for synthesizing from qualitative studies: meta-ethnography. After citing the criteria to be used in comparing qualitative research projects, the authors define the ways these can then be aggregated to create more cogent syntheses of research. Using examples from numerous studies ranging from ethnographic work in educational settings to the Mead-Freeman controversy over Samoan youth, Meta-Ethnography offers useful procedural advice from both comparative and cumulative analyses of qualitative data. This provocative volume will be read with interest by researchers and students in qualitative research methods, ethnography, education, sociology, and anthropology. "After defining metaphor and synthesis, these authors provide a step-by-step program that will allow the researcher to show similarity (reciprocal translation), difference (refutation), or similarity at a higher level (lines or argument synthesis) among sample studies....Contain(s) valuable strategies at a seldom-used level of analysis." --Contemporary Sociology "The authors made an important contribution by reframing how we think of ethnography comparison in a way that is compatible with the new developments in interpretive ethnography. Meta-Ethnography is well worth consulting for the problem definition it offers." --The Journal of Nervous and Mental Disease "This book had to be written and I am pleased it was. Someone needed to break the ice and offer a strategy for summarizing multiple ethnographic studies. Noblit and Hare have done a commendable job of giving the research community one approach for doing so. Further, no one else can now venture into this area of synthesizing qualitative studies without making references to and positioning themselves

vis-a-vis this volume." -Educational Studies

Educational Research John W. Creswell 2014-03-17 This title is only available as a loose-leaf version with Pearson eText, or an electronic book. A practical, step-by-step core research text that balances coverage of qualitative and quantitative methods Educational Research: Planning, Conducting, and Evaluating Quantitative and Qualitative Research offers a truly balanced, inclusive, and integrated overview of the field as it currently stands. This text provides thorough coverage of the methods and procedures used in quantitative, qualitative, and mixed-methods research. It helps students learn how to begin to conduct research and see a project through preparation of a manuscript, and it also helps students learn how to read and evaluate research reports. Video-Enhanced Pearson eText. Included in this package is access to the new Video-Enhanced eText for exclusively from Pearson. The Video-Enhanced Pearson eText is: Engaging. Integrating Qualitative and Social Science Factors in Archaeological Modelling Mehdi Saqalli 2019-07-04 This book covers the methodological, epistemological and practical issues of integrating qualitative and socio-anthropological factors into archaeological modeling. This text fills the gap between conceptual modeling (which usually relies on narratives describing the life of a past community) and formalized/computer-based modeling which are usually environmentally-determined. Methods combining both environmental and social issues through niche and agent-based modeling are presented. These methods help to translate data from paleo-environmental and archaeological society life cycles (such as climate and landscape changes) into the local spatial scale. The epistemological discussions will appeal to readers as well as the resilience socio-anthropological factors provide facing climatic fluctuations. Integrating Qualitative and Social Science Factors in Archaeological Modelling will appeal to students and researchers in the field.

Qualitative Research Methods In Psychology: Combining Core Approaches Frost, Nollaig 2011-05-01 This book introduces the single use of four widely-used qualitative approaches and then introduces ways and applications of using the approaches in

combination. Personal insight into qualitative research practice from each of the contributors covers health psychology, social psychology, criminal psychology, gender studies psychotherapy, counselling psychology and organizational psychology. Overview: MELQO UNESCO 2017-08-14 The Measuring Early Learning Quality and Outcomes (MELQO) initiative began in 2014 as part of the global emphasis on early childhood development (ECD). Led by UNESCO, the World Bank, the Center for Universal Education at the Brookings Institution and UNICEF, the initiative aims to promote feasible, accurate and useful measurement of childrenâs development and learning at the start of primary school, and of the quality of their pre-primary learning environments. Items are designed for children between the ages of 4 and 6 years. Following the premise that many existing tools include similar items, the leading organizationsâ core team worked with a consortium of experts, non-governmental organizations (NGOs) and multilaterals to build upon current measurement tools to create a common set of items organized into modules for measuring: 1) early childhood development and learning, and 2) the quality of pre-primary learning environments. The MELQO core team and experts also collaborated to outline a process for context-specific adaptation of the measurement modules resulting from lessons learned from field-testing in several countries in 2015 and 2016. The modules are designed to be implemented at scale, with an emphasis on feasibility for low- and middle-income countries (LMICs). A key question addressed by MELQO was the balance between a global tool suitable for use everywhere, and local priorities and goals for childrenâs development. [Introduction, ed] Encyclopedia of Human Computer Interaction Ghaoui, Claude 2005-12-31 Esta enciclopedia presenta numerosas experiencias y discernimientos de profesionales de todo el mundo sobre discusiones y perspectivas de la la interacción hombre-computadoras Children's needs - parenting capacity Hedy Cleaver 2011-10-12 This second edition of "Children's needs - parenting capacity" updates the original exploration of the research literature in the light of legal and policy changes in England and findings from more recent national and international research. The edition has also been expanded to cover parental learning disabilities and how it may impact on parenting and children's health and development. The findings show that these parenting issues affect children differently depending on their age and individual circumstances. While some children grow up apparently unscathed, others exhibit emotional and behavioural disorders. This knowledge can inform practitioners undertaking assessments of the needs of children and their families and effective service responses. This publication is essential reading for practitioners, managers and policy makers concerned with improving the outcomes for children and families who are experiencing such problems.
