[Voice and Vision: A Creative Approach to Narrative Film and DV Production Mick Hurbis-Cherrier 2007-03-13](#) Voice & Vision is a comprehensive manual for the independent filmmakers and film students who want a solid grounding in the tools, techniques, and processes of narrative film in order to achieve their artistic vision. This book includes essential and detailed information on relevant film and digital video tools, a thorough overview of the filmmaking stages, and the aesthetic considerations for telling a visual story. The ultimate goal of this book is to help you develop your creative voice while acquiring the solid practical skills and confidence to use it. Unlike many books that privilege raw technical information or the line-producing aspects of production, Voice & Vision places creativity, visual expression, and cinematic ideas front and center. After all, every practical decision a filmmaker makes, like choosing a location, an actor, a film stock, a focal length, a lighting set-up, an edit point, or a sound effect is also an expressive one and should serve the filmmaker's vision. Every decision, from the largest conceptual choices to the smallest practical solutions, has a profound impact on what appears on the screen and how it moves an audience. "In Practice sidebars throughout Voice & Vision connect conceptual, aesthetic and technical issues to their application in the real world. Some provide a brief analysis of a scene or technique from easily rentable films which illustrate how a specific technology or process is used to support a conceptual, narrative, or aesthetic choice. Others recount common production challenges encountered on real student and professional shoots which will inspire you to be innovative and resourceful when you are solving your own filmmaking challenges.

[American Ethnographic Film and Personal Documentary Scott MacDonald 2013-06-04](#) American Ethnographic Film and Personal Documentary is a critical history of American filmmakers crucial to the development of ethnographic film and personal documentary. The Boston and Cambridge area is notable for nurturing these approaches to documentary film via institutions such as the MIT Film Section and the Film Study Center, the Carpenter Center and the Visual and Environmental Studies Department at Harvard. Scott MacDonald uses pragmatism's focus on empirical experience as a basis for measuring the groundbreaking achievements of such influential filmmakers as John Marshall, Robert Gardner, Timothy Asch, Ed Pincus, Miriam Weinstein, Alfred Guzzetti, Ross McElwee, Robb Moss, Nina Davenport, Steve Ascher and Jeanne Jordan, Michel Negroponte, John Gianvito, Alexander Olch, Amie Siegel, Ilisa Barbash, and Lucien Castaing-Taylor. By exploring the cinematic, personal, and professional relationships between these accomplished filmmakers, MacDonald shows how a pioneering, engaged, and uniquely cosmopolitan approach to documentary developed over the past half century.
