The Outboard Boater's Handbook: Advanced Seamanship and Practical Skills David Getchell 1994 This comprehensive manual shows you how to go places and do things you never thought possible in a small outboard motorboat. A well-designed ruggedly built 17-footer, for instance, can fish offshore, circumnavigate Lake Superior, and crisscross the continent on inland waterways or on a trailer pulled by the family car. Small outboards are among the most versatile boats ever developed and are far more able than you might expect. Covered here are all the popular types--and some exciting alternatives as well as methods that may change your entire boating outlook. Aided by contributions from other experts, veteran outboard skipper David R. Getchell, Sr., offers a wealth of useful facts and special savvy that reveal for the first time in a single book the true potential of these democratic boats 20 feet and under. Here are the means to understand what can be done, and the way to do it safely, including: how to judge a boat's potential and capabilities based on design and construction; how to rebuild an older boat; how to handle a little boat in big seas, surf, or shallow water; how to navigate; how to read the weather; how to head upriver or offshore; how to trailer your boat; how to manage and equip it for camp cruising on a nearby lake or for subarctic exploration; and how to care for the boat and motor.

Tide Rips and Back Eddies Bill Proctor 2015-10-10 Billy Proctor, resident legend of Echo Bay, BC, recounts almost a century's worth of experience with this collection of stories, memories and local knowledge of the central BC coast region around Blackfish Sound. Situated in the beautiful Broughton Archipelago between northern Vancouver Island and the mainland coast, this region boasts a history and culture as engaging as its stunning locale—and nobody tells its story quite like Proctor. A lifelong fisherman, trapper, logger and, in later life, author, Proctor learned from both the indigenous Kwakwaka'wakw people and the settlers who came to live in Blackfish Sound. Along with his entertaining tales of the surrounding communities, Proctor also discusses the ingenious technology necessary to both fishing and everyday survival. Covering the natural and domestic history of the area and everything in between—from recollections of old-time fishermen to Billy's own stories of sasquatches and other strange things—Tide Rips and Back Eddies is a riveting and deeply moving account of a long and uniquely coastal life. Writing collaborator Yvonne Maximchuk's drawings illustrate Proctor's personal anecdotes as well as carefully detail an eclectic array of interesting items collected by Proctor throughout his lifetime for his personal museum. Tide Rips and Back Eddies is not only a historical archive of immeasurable significance, it is a fascinating read for those interested in the Blackfish Sound region as well as an honest and whimsical look into the life and lessons learned by a local legend.

Nigerian Information and Communications Technology Handbook 2005 Compumetrics Solutio Staff 2003 This volume revises and updates the 2003 handbook on the ICT sector in Nigeria. It is a timely publication as Nigeria moves from being a country overwhelmingly dependent on oil, to a multi-product economy, with ICTs now representing US\$1.3bn per annum. There is still however a dearth of data and information on the nature, characteristics and need to track the progress and dynamics of the industry.
