Assessment and Learning in Content and Language Integrated Learning (CLIL) Classrooms Mark deBoer 2020-11-17 This volume builds a conceptual basis for assessment promoting learning in Content and Language Integrated Learning (CLIL) classrooms and proposes practical assessment approaches and activities that CLIL teachers can apply in the classroom. CLIL as an educational context is unique, as language and content learning happen simultaneously. The efficacy of such instruction has been studied extensively, but assessment in CLIL classrooms has drawn much less attention. The present volume aims to fill this gap. Arranged based on different ways that content and language are integrated in CLIL, the chapters in this book together build a solid theoretical basis for assessment promoting learning in CLIL classrooms. The authors discuss how assessment eliciting this integration yields insights into learners' abilities, but more importantly, how these insights are used to promote learning. The contributors to the volume together build the understanding of classroom-based assessment as cyclic, of teaching, learning, and assessment as inter-related, and of content and language in CLIL classrooms as a dialectical unity. This volume will spark interest in and discussion of classroom-based assessment in CLIL among CLIL educators and researchers, enable reflection of classroom assessment practices, and foster collaboration between CLIL teachers and researchers. The assessment approaches and activities discussed in the volume, in turn, will help educators understand the scope of applications of assessment and inspire them to adapt these to their own classrooms.

A Revolution in Language Sophia A. Rosenfeld 2003-08-01 What is the relationship between the ideas of the Enlightenment and the culture and ideology of the French Revolution? This book takes up that classic question by concentrating on changing conceptions of language and, especially, signs during the second half of the eighteenth century. The author traces, first, the emergence of a new interest in the possibility of gestural communication within the philosophy, theater, and pedagogy of the last decades of the Old Regime. She then explores the varied uses and significance of a variety of semiotic experiments, including the development of a sign language for the deaf, within the language politics of the Revolution. A Revolution in Language shows not only that many key revolutionary thinkers were unusually preoccupied by questions of language, but also that prevailing assumptions about words and other signs profoundly shaped revolutionaries' efforts to imagine and to institute an ideal polity between 1789 and the start of the new century. This book reveals the links between Enlightenment epistemology and the

development of modern French political culture.

Teaching Translation from Spanish to English Allison Beeby Lonsdale 1996 While many professional translators believe the ability to translate is a gift that one either has or does not have, Allison Beeby Lonsdale questions this view. In her innovative book, she demonstrates how teachers can guide their students by showing them how insights from communication theory, discourse analysis, pragmatics, and semiotics illuminate the translation process. Challenging long-held assumptions, she establishes a fascinating framework on which to base the structure of a professional prose-translation class. Her original contributions to the question of directionality and to the specific strategies of translating are applicable to not only the teaching of translation from Spanish to English, but to other teaching situations and to other pairs of languages as well. She also reviews the latest attempts in translation theory to define and contextualize ideal translator competence, student translator competence, and general translation strategies. Beeby Lonsdale completes her book by applying her conclusions to selecting and organizing the content of teaching translation from Spanish to English. She illustrates one or more of the basic translation principles through 29 teaching units, which are prefaced by objectives, tasks, and commentaries for the teacher, and through 48 task sheets, which show how to present the material to students.
