Engineering Economy Leland T. Blank 2001-08-01 This student-friendly text on the current economic issues particular to engineering covers the topics needed to analyze engineering alternatives. Students use both hand-worked and spreadsheet solutions of examples, problems and case studies. In this edition the options have been increased with an expanded spreadsheet analysis component, twice the number of case studies, and virtually all new end-of-chapter problems. The chapters on factor derivation and usage, cost estimation, replacement studies, and after-tax evaluation have been heavily revised. New material is included on public sector projects and cost estimation. A reordering of chapters puts the fundamental topics up front in the text. Many chapters include a special set of problems that prepare the students for the Fundamentals of Engineering (FE) exam. This text provides students and practicing professionals with a solid preparation in the financial understanding of engineering problems and projects, as well as the techniques needed for evaluating and making sound economic decisions. Distinguishing characteristics include learning objectives for each chapter, an easy-to-read writing style, many solved examples, integrated spreadsheets, and case studies throughout the text. Graphical cross-referencing between topics and quick-solve spreadsheet solutions are indicated in the margin throughout the text. While the chapters are progressive, over three-quarters can stand alone, allowing instructors flexibility for meeting course needs. A complete online learning center (OLC) offers supplemental practice problems, spreadsheet exercises, and review questions for the the Fundamentals of Engineering (FE) exam.

PHP & MySQL: The Missing Manual Brett McLaughlin 2012-11-13 If you can build websites with CSS and JavaScript, this book takes you to the next level—creating dynamic, database-driven websites with PHP and MySQL. Buy only from known sellers and if there are quality issues, please contact the seller for a refund.\*\*\*\*\* Breast Tumours is the second volume in the 5th edition of the WHO series on the classification of human tumors. This series (also known as the WHO Blue Books) is regarded as the gold standard for the diagnosis of tumors and comprises a unique synthesis of histopathological diagnosis with digital and molecular pathology. These authoritative and concise reference books provide indispensable international standards for anyone involved in the care of patients with cancer or in cancer research, underpinning individual patient treatment as well as research into all aspects of cancer causation, prevention, therapy, and education. This book will be of special interest to pathologists, oncologists, surgeons and epidemiologists who manage or research breast tumors. Sections are included on all recognized neoplasms of the breast including the nipple and areola. Since the previous edition there have been changes based on recent molecular and genetic information, with impact on clinical practice.

Numerical Methods with Worked Examples: Matlab Edition C. Woodford 2011-09-08 This book is for students following an introductory course in numerical methods, numerical techniques or numerical analysis. It introduces MATLAB as a computing environment for experimenting with numerical methods. It approaches the subject from a pragmatic viewpoint; theory is kept at a

minimum commensurate with comprehensive coverage of the subject and it contains abundant worked examples which provide easy understanding through a clear and concise theoretical treatment. This edition places even greater emphasis on 'learning by doing' than the previous edition. Fully documented MATLAB code for the numerical methods described in the book will be available as supplementary material to the book on <http://extras.springer.com>

Workforce 2020 Richard W. Judy 1997 Ten years ago Hudson Institute's landmark study Workforce 2000 set the agenda for a new understanding of workforce issues. Described by the New York Times as "one of the most influential studies ever produced by a think tank," this groundbreaking report set the terms for much of the policy discussion at the government and corporate levels on these issues. It was the first to call attention to the changing demographics of the American workforce and the growing gap between the skills likely to be required for entry-level jobs in the future and those likely to be possessed by new entrants into the labor force. Now Hudson releases its long-awaited follow-up: Workforce 2020. Like its predecessor, the new book examines the trends that shape the economy and workforce, and combines them into a unique and fresh body of analysis. The authors set the record straight on the demographic makeup of the workforce in the years 2000 to 2020 and challenge the conventional wisdom on trends affecting American workers and employers. Analyzing important emerging issues, they detail the coming demographic changes in the workforce--and their potentially serious effects on the job market and the economy as a whole. The book also considers the effects of globalization on U.S. business and the American worker, the impact of rapid technological change, the "skills gap" identified in the earlier report, and the need for a new model of education, training, and employment services to prepare workers for the jobs of the next century. Workforce 2020 is an indispensable guide to the next decade of workforce issues.

Alternative Funding Sources James L. Catanzaro 1989 In an effort to identify and tap new sources of funds for community colleges, this monograph presents a series of descriptive articles on the most successful alternative funding ventures. In addition, the sourcebook provides a sense of where and how new ventures have aided two-year colleges and how other institutions might follow in this pursuit. The following articles are included: (1) "The Community College Foundation Today: History, Characteristics, and Assets," by Dan Angel and Dale Gares, and "Reasons for Success," by G. Jeremiah Ryan; (2) "Foundation Restricted Funds, A Special Application: Miami-Dade's Endowed Teaching Chair," by Horace Jerome Traylor, Stephen G. Katsinas, and Siegfried E. Herrmann; (3) "Alumni: Friends and Funds for Your Institution," by Richard J. Pokrass; (4) "Alternative Education/Alternative Revenue: Contract Training--Public and Private Sector Models," by Raymond Lestina and Beverly A. Curry, and "Media Technology Begets Revenue," by Jana B. Kooi; (5) "Economic Development, the Community College, and Technology Training," by Steve Maradian; (6) "Entrepreneurship in the Community College: Revenue Diversification," by Richard W. Brightman; (7) "A Case for Commercial Development of College Property," by Richard W. McDowell and W. Kenneth Lindner; and (8) "Performance Contracting: Profits and Perils," by Charles C. Spence and Jeffrey G. Oliver. Appendixes provide a guide to key resources and a list of companies that provide matching funds to junior or community colleges. (VVC)

Lens Design Milton Laikin 2018-10-03 There is no shortage of lens optimization software on the market to deal with today's complex optical systems for all sorts of custom and standardized applications. But all of these software packages share one critical flaw: you still have to design a starting solution. Continuing the bestselling tradition of the author's previous books, Lens Design, Fourth Edition is still the most complete and reliable guide for detailed design information and procedures for a wide range of optical systems. Milton Laikin draws on his varied and extensive experience, ranging from innovative cinematographic and special-effects optical systems to infrared and underwater lens systems, to cover a vast range of special-purpose optical systems and their detailed design and analysis. This edition has been updated to replace obsolete glass types and now includes several new designs and sections on stabilized systems, the human eye, spectrographic systems, and diffractive systems. A new CD-ROM accompanies this edition, offering extensive lens prescription data and executable ZEMAX files corresponding to figures in the text. Filled with sage advice and completely illustrated, Lens Design, Fourth Edition supplies hands-on guidance for the initial design and final optimization for a plethora of commercial, consumer, and specialized optical systems.

Don't Just Sit There, DO NOTHING Jessie Asya Kanzer 2022-03-01 "Stressed-out readers will find her advice a salve in an overly hurried and critical world." —Publisher's Weekly "Jessie Asya Kanzer is like a Taoist Anne Lamott, and she's written a practical and actionable guide." —Joel Fotinos, author of The Prosperity Principles Here are 47 inspirational pieces that are smart, hip, accessible, and rich with insight; Jessie Asya Kanzer's bite-sized stories of struggle, triumph, and contemplation provide a quick burst of mindfulness. Each chapter begins with a verse from the Tao, followed by sharp observations and anecdotes from her own life that give the teachings of Lao Tzu applicability to contemporary life. And each chapter concludes with a "Do Your Tao" section that offers an actionable step, leaving the reader with a sense of grounding and fluidity. ? Chapters include: "Success Sucks (Sometimes)," "F\*ck This, I'm Water," "I Love You, I Not Love You," "The Tao of Babushka," and "Mystics Wear Leggings".

Chest x-ray interpretation Sics Editore 2014-10-01 When examining the picture, use an adequate light table or picture monitor. Do not examine x-rays, for example, against a window. The background lighting should be dim. Always compare present abnormalities with findings in earlier x-rays if they are available. Was the abnormality present already in the earlier x-ray? Has it become larger or declined? Interpretation of the chest x-ray is not simple. Ask for interpretation by a radiologist if necessary. A chest x-ray that appears normal at first sight may hide significant pathology, e.g. behind the heart, mediastinum or diaphragm. Erroneus interpretation of an x-ray image is often associated with problems of perception. Many normal structures (e.g. cross-sections of blood vessels) and/or their superimposed projections may also cause false positive interpretations. The radiation dose from a chest x-ray is rather low (postero-anterior x-ray about 0.03 mSv, corresponding to 3 days' natural background radiation, and lateral x-ray about twice as much).

Multinational Enterprises and the Global Economy John H. Dunning 2008-01-01 For many years to come this volume. . . is surely going to be the ultimate reference work on international business. . . thanks to Dunning and Lundan, have at their disposal, a wealth of relevant data, as well as theoretical and empirical analyses, which will enable them to assess the capabilities, contributions and challenges posed by the multinational enterprises to the global economy. Seev Hirsch, International Business Review Multinational Enterprises and the Global Economy has become a classic in international business. . . Yet , the book s second edition is even better than the first, in part because of Professor Dunning s wise decision to choose Dr Lundan as his co-author and to draw upon her deep knowledge of various strands of research on business government relations and the societal effects of firm behaviour. . . In addition to being a remarkably useful reference book, Multinational Enterprises and the Global Economy is the first book any IB doctoral student should read to understand the significance and richness of IB scholarship as it has developed over the past 50 years. Alain Verbeke, Journal of International Business Studies The second edition of Multinational Enterprises and the Global Economy provides unparalleled coverage not only of the literature relevant to IB research but also of the evolution of IB in the world economy. Dunning and Lundan offer powerful insights into the societal effects of MNEs and

the role of business government relations in the IB context. *Journal of International Business Studies* This wonderful book offers the definitive synthesis of the modern literature on the economic aspects of international business. It is encyclopedic yet full of incisive insights. It is a creative masterpiece which unbundles the DNA of the multinational enterprise and shows how it is the cornerstone of the field of international business. Alan M. Rugman, University of Reading, UK The rise of the multinational enterprise, and the consequent globalisation of the world economy, was arguably the single most important phenomenon of the second half of the twentieth century. This magisterial book, written by two leading authorities, examines this phenomenon in depth. It explains how foreign investment by multinationals diffused advanced technologies and novel management methods, driving productivity growth in Europe, Asia and North America; however, economic inequalities were reinforced as rich countries attracted more foreign investment than poor ones. This new edition of a classic work is not only an authoritative guide to contemporary multinational business, but a major historical resource for the future. Mark Casson, University of Reading, UK This thoroughly updated and revised edition of a widely acclaimed, classic text will be required reading for academics, policymakers and advanced students of international business worldwide. Employing a distinctive and unified framework, this book draws together research across a range of academic fields to offer a synthesis of the determinants of MNE activity, and its effects on the economic and social well-being of developed and developing countries. Unique to the new edition is its focus on the institutional underpinnings of the resources and capabilities of MNEs, and the role of MNE activity in transmitting and facilitating institutional change. Since the initial publication of this book more than a decade ago, the economic, managerial and social implications of globalisation and technological advancement have become even more varied and prominent. Accompanying these developments, there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever-changing physical and human environment. Drawing on articles and books from international business and economics, as well as economic geography, political economy and strategic management, a systematic overview of the developments in scholarly thinking is prese

*Visual Identification of People by Computer* Michael David Kelly 1970 The thesis describes a computer program which performs a complex picture processing task. The task is to choose, from a collection of pictures of people taken by a TV camera, those pictures that depict the same person. The primary purpose of this research has been directed toward the development of new techniques for picture processing. (Author).
